

## Delete a Resource (http.client)

Description: Write a Python program that sends a DELETE request to delete the post with id=1 at <https://jsonplaceholder.typicode.com/posts/1>. Print "Deleted successfully" if the operation is acknowledged by the server. Use http.client module to connect to the server.

Input: None.

Output (without unit test): Deletion confirmation.

Output (with unit test):

```
connection called with: call('jsonplaceholder.typicode.com')
request called with: call('DELETE', '/posts/1')
connection closed: call()
test attribute passed: Failed to delete is equal to Failed to delete
connection called with: call('jsonplaceholder.typicode.com')
request called with: call('DELETE', '/posts/1')
connection closed: call()
test attribute passed: Deleted successfully is equal to Deleted
successfully
```
