

Update Resource Partially

Description: Create a Python script to send a PATCH request to `jsonplaceholder.typicode.com/posts/1` updating the title to "Updated Title". Print the new title of the post after the update. Use the `socket` module to solve this problem.

Input: None.

Output (without unit test): The updated title of the post.

Output (with unit test):

```
connect called with: call(('jsonplaceholder.typicode.com', 80))
send called with: call(b'PATCH /posts/1 HTTP/1.1\r\nHost:
jsonplaceholder.typicode.com\r\nContent-Type: application/
json\r\nContent-Length: 26\r\nConnection: close\r\n\r\n{"title":
"Updated Title"}')
recv called with: call(4096)
test attribute passed: Updated Title is equal to Updated Title
```
